Shelsy N Corado-Perez

shelsy_coradope@berkeley.edu |linkedin.com/in/shelsycorado | https://github.com/shelly350

EDUCATION

University of California, Berkeley **Berkeley, CA**
Bachelor of Arts in Computer Science and Data Science *08/2025 – 05/2029*

- **Relevant Coursework:** Data Structures, Foundations of Data Science, Machine Structures

EXPERIENCE

LG Nova, Atlas (Client Project) **Berkeley, CA**
Software Engineering *9/2026 – Present*

- Create interfaces (using React and Tailwind) based on data analysis and improve Flask REST APIs by introducing AI-generated summaries, semantic search, and data enrichment capacity
- Use PostgreSQL technology to handle semantic search and manage data models for various agreements, assignments, and startups
- Work together with the cross-disciplinary engineering team to launch completed products, which help LG NOVA support technology entrepreneurs
- Work on frontend, backend, and AI/ML development in Atlas. This is the business processing and decision optimization platform developed by LG NOVA for executives and interdisciplinary teams

Legali AI **Los Angeles, CA**
Software Engineering Intern *06/2026 – 07/2026*

- Developed features for a mental wellness platform using Flutter and Dart, turning product requirements into functional software
- Built and tested features in an iOS environment, debugging behavior and refining functionality based on project needs
- Used AI-assisted development tools to debug issues across the stack and accelerate implementing of React/Flask features
- Used Git and GitHub to manage development and work with the team in a software engineering setting

PROJECTS

Air Quality Data Project, FLi Sci Data Science Cohort *05/2024 – 09/2025*

- I analyzed 9 environmental datasets, each with over 500 rows, to look at pollution trends and environmental risk factors
- Data analysis was done to explore the information, and visualizations were created to show technical findings to peers and mentors

Find A Local Service, CS Kickstart Project (UC Berkeley) *08/2025*

- Developed a responsive web platform connecting local businesses with potential clients
- Implemented ZIP code and service-type search and business profiles with descriptions and images to improve discoverability

LEADERSHIP

CS10 (UC Berkeley) **University of California, Berkeley**
Teaching Intern *08/2026 – Present*

- Provide one-on-one and small-group support during labs and project work, breaking down complex CS concepts for beginner programmers a responsive web platform to connect local businesses with potential clients

Fonar (Open Project) **University of California, Berkeley**
Frontend Developer *01/2026 – 05/2026*

- Manage the project's scope, timelines, and task delegation and coordinate development milestones
- Collaborate with the team to track progress and keep them updated on project findings

TECHNICAL SKILLS

Skills: Python, Java, R, SQL, Pandas, NumPy, Exploratory Data Analysis, Data Visualization, C, Debugging
Developer Tools: Git, GitHub, IntelliJ, RStudio, Supabase, Claude Code, Unreal Engine, Linux

HOBBIES & INTREST

Pokemon, Gaming, Legos, Photography, Soccer, Hiking
